	TOTAL :	151.83	37.44

Providing potable water under water decade

1464. SHRI CHATURANAN MISHRA: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that even after the Water Decade several Villages in India are still without sources of potable water;

(b) what is the total number of villages by the end of Water Decade and how many more remained to be covered;

(c) what is the number of problem villages provided with potable water after the Water Decade and haw may more remains to be covered;

(d) whether more areas have been subsequently added to the list of problem villages since the end of Water Decade and what is the time set for achieving total coverage; and

(e) what steps have been taken to rectify the dislocation of water supplies by this year's monsoon, especially in the Western parts of Kerala and other regions of the country?

THE MINISTER OF STATE IN THE MINISTRY OF RURAL DEVELOPMENT (SHRI UTTAMBHAI H. PATEL): (a) Yes, Sir.

(b) Out of total number 5,83,003 villages in the country 5,77,670 villages had safe drinking water facilities. No Source problem villages numbering 5333 remained to be covered.

(c) From 1-4-91 to 31-10-91, 372 No Source problem villages have been covered as per the reports received from various State and the remaining 4961 problem villages are yet to be covered.

(d) No more problem villages have been subsequently added to the list of identified problem villages since the end of Water Decade. All the residual problem villages are likely to be covered with safe drinking water facilities by 31-3-1993. A survey of Status of drinking water supply in rural habitations is currently under progress.

(e) The drinking water supply schemes in rural areas are being taken up under the State sector Minimum Needs Programme, the Centrally Sponsored Accelerated Rural Water Supply Programme and the mini mission projects. No specific proposal has been received from Kerala and other regions of the country to rectify the dislocation of water supplies by this year's monsoon.
